

# *Certificate of Conformity*

STARLAB PCR tubes and strips are compatible with most thermal cyclers. Every effort has been made to ensure a perfect fit. STARLAB cannot take responsibility for any incompatibilities. We are indicating that tubes and strips may fail to fit in cases where the thermo block of the cycler is pretty much worn or damaged. As thermo cycler manufacturers modify their machines from time to time, we cannot guarantee the tube or strip fit for new types of cyclers. We recommend to check compatibility before placing an order and performing experiments. We are happy to provide free samples. Please contact your local STARLAB supplier.
